WHAT YOU SHOULD KNOW ABOUT LUCKY NUMBERS

Numerology uses specific algorithms to identify numbers that relate favorably to you based on your most significant characteristics.

Luck and attitude often go hand in hand; the influence of certain Lucky Numbers is enhanced by your mindset.

Luck is fickle and not always what it appears to be. If someone wins a million dollars, buys a fast car, and crashes it, was winning the lottery lucky? Lady Fortune appears in many forms: a promotion because of an unexpected change in circumstances, meeting the love of your life after exiting the elevator on the wrong floor, a last-minute change in travel plans that proves to have saved you from disaster. The list of lucky "coincidences" is endless.

Note: Yearly lucky numbers are in cyan, monthly are blue, and daily lucky numbers are green.

Disclaimer: To my knowledge, no studies exist to validate or dispute the effect of Lucky Numbers. I do not advise you to purchase large quantities of lottery tickets or take your savings to the nearest casino. Lucky Numbers are not a guarantee you will win.
